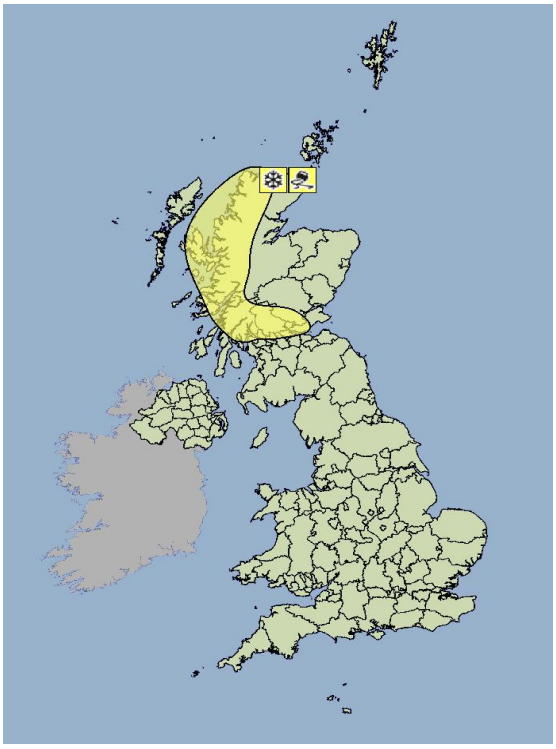
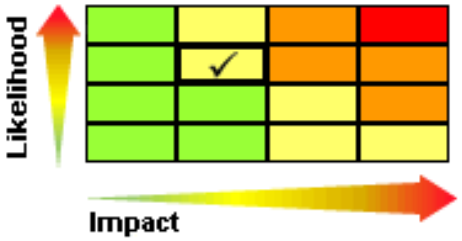
National Severe Weather Warning Service





Chief Forecasters Assessment
The cold northwesterly flow will continue to bring showers of rain, sleet and snow on Wednesday night and Thursday morning. Some further accumulations are possible especially over ground above 200 m where a further 3 to 8 cm is possible locally. At lower levels snow accumulations will be generally small, locally 1 to 3 cm. Here the main risk is icy patches, especially where showers wash off any previous treatment.

The Met Office have issued a **Yellow Warning** of **Snow and Ice**

Valid from **16:00 on Wed, 17th Jan 2018** until **11:00 on Thu, 18th Jan 2018**

Some snow and icy patches are expected on Wednesday night and Thursday morning.

Showers of rain, sleet and snow are expected to continue through Wednesday night and into Thursday morning bringing the risk of further accumulations of snow and icy patches.

Some roads and railways are likely to be affected with longer journey times by road, bus and train services. Some injuries from slips and falls on icy surfaces, especially where showers wash off treatment and on untreated pavements and cycle paths.
